

RULES

Hacking rules

- You must be at ETHBerlin to work on a project for submission.
- Your hack must be related to decentralization, cryptography, or privacy.
- You can plan ahead of time, but all code for your project has to be written during the event.
- You cannot use another team's source code.
- The decision of judges is final for determining prizes and awards.
- Please comply with all instructions from ETHBerlin organizers.
- Please respect our Code of Conduct!

Minimum requirements to be judged

- A link to the open-source code must be provided
- A short presentation file must describe your project
- If applicable, the contract address(es) of your deployed demo must be provided, either on a testnet of your choice or mainnet of a platform of choice.
